

# ETHICS OF ARTIFICIAL INTELLIGENCE

FRANÇOIS GOULETTE - MINES PARISTECH (ROBOTICS, 3D PERCEPTION)

AÏDA ELAMRANI – INSTITUT JEAN NICOD, ENS (PHILOSOPHY OF AI)

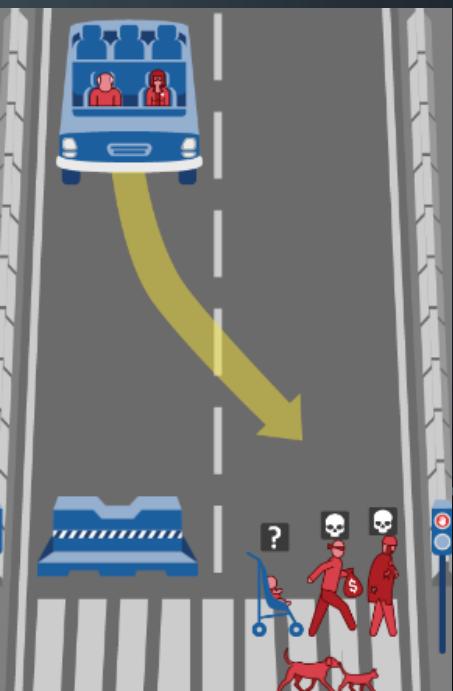

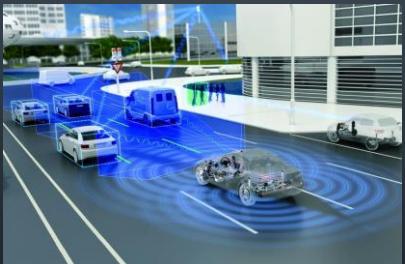

OLIVIA TAMBOU – DAUPHINE (DIGITAL LAW)

SERGE ABITEBOUL - ENS, ACAD. SCIENCES (COMP. SCI., MANAGEMENT)

THIERRY POIBEAU – ENS, PRAIRIE (AUTOMATIC LANGUAGE PROCESSING)

# PROBLEMS EMERGING FROM THE USE OF AI

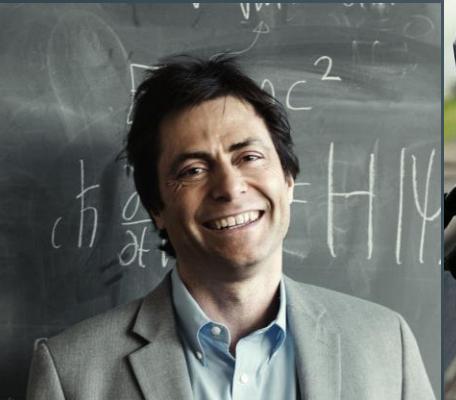

- Surveillance, facial recognition, geolocalisation
- Automation and work
- Assisted decision making (law, healthcare, ...)
- Autonomous weapons and vehicles
- Virtual and Augmented Reality
- Misinformation
- Cryptocurrencies
- Cybercrime
- Algorithmic biases
- ...

# WHICH OUTCOME?

## Extinction threat

Max Tegmark

Stephen Hawking

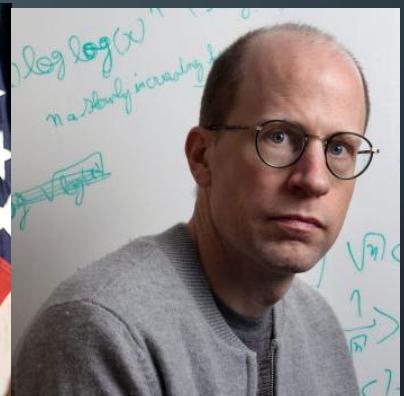

## Transhumanism

Ray Kurzweil

Nick Bostrom

# AIMS AND SCOPE

- Explain how and why the digital revolution is challenging our moral values
- Provide technical and theoretical knowledge about the ethics of A.I., from several perspectives
  - Computer Science
  - Law
  - Philosophy
  - Industry
- Enhance your analytical skills

# OVERVIEW OF THE COURSE

- **Courses :**
  - Challenges of the digital revolution; epistemology and moral philosophy ; digital law ; explainability ; biases ; responsibility ; social media ;
  - Conferences : autonomous véhicules, assisted decision in healthcare, ...
- **Evaluation : projects (collaborative work among groups of students)**
  - Case studies, for instance : autopilot (Tesla) ; Virtual Reality (Oculus Quest 2) ; Facial recognition (Megvii)...
  - Aim : analyse the ethical problems raised by your case study ; provide some solutions (technical, philosophical, legal)
  - Output : small report, short talk
- **PSL WEEK, 22-26 November 2021, U. Paris Dauphine**
  - Priority to IASD students (option)
  - Open to all, but limited seats
